

OINK OINK, HODLERS! WELCOME TO THE PIG PARTY!

WTF IS PIGGY BANK?

Piggy Bank (ticker: OINK) isn't just another memecoin—it's the dankest protocol on PulseChain, blending Bitcoin's hardcore scarcity with a community treasury that's got more vibes than a TikTok dance trend. Think Bitcoin, but greener, funnier, and with a piggy bank that you control.

- Like Bitcoin, but better: Fixed 21 BILLION OINK supply (because bigger numbers = more fun). No central suits, no whale overlords, just pure decentralized chaos.
- Eco-friendly flex: No energy-hogging mining rigs. Mine OINK with your existing PLS, PLSX, HEX, INC, or even NFTs. Save the planet, make pigs fly.
- Community piggy bank: Fees and penalties fill a treasury controlled by you via governance. Vote to fund dope dApps, memes, charity, or even buy back OINK and make pigs fly (no promises of mooning, tho—DYOR).
- Governance that slaps: Long-term HODLers and a Senate of based chads keep whales in check. This is democracy, blockchain style.

WHY PIGGY BANK IS THE GOAT

We yinked Bitcoin's best parts—scarcity, decentralization, trustlessness—and added a spicy twist: a treasury and governance that let the community run the show.

- Bitcoin's problem: Miners and whales can get too thicc. Piggy Bank's Senate (one person, one vote) vetoes any whale nonsense. No Moby Dick vibes here.
- Treasury vibes: Unlike Bitcoin's "just HODL" energy, our treasury funds public goods, dApps, or OINK buybacks to juice the ecosystem (not a promise of profits—chill, SEC).
- Meme-powered: Bitcoin's meme game is weak. OINK's meme potential? Over 9000.

Feature	Bitcoin	Piggy Bank
Max Supply	21 Million	21 Billion (more zeros, more fun)
Mining Hardware	Expensive ASICs	None—just your tokens!
Energy Use	Kills polar bears 🐻	Green AF ✅
Transaction Speed	10 minutes	Seconds ⚡
Meme Potential	Meh 😐	PIGS FLY 🚀
Treasury	None	Community-controlled 💰
Governance	Miners rule	HODLers + Senate 🏛️

HOW IT WORKS: PIGGY BANK 101

1. Mine OINK, Get Swole

- Use PLS, PLSX, HEX, INC, or NFTs to mine OINK. No fancy hardware, just diamond hands.
- Lock OINK in time-locked miners for rewards. Longer locks = bigger rewards + more governance power. Early exit? Penalties up to 82%. HODL or NGMI.

2. Treasury: The Piggy Bank

- Fees and penalties flow into the community treasury. Vote to spend it on:
 - Public goods (bridges, not scams)
 - Dope dApps
 - Charity (tax write-offs, but cooler)
 - OINK buybacks to “make pigs fly” (no price guarantees, fam).
- Anyone can propose ideas—permissionless and based.

3. Governance: You’re the Boss

- Voting Power: Long-term miners get more say. Lock longer, flex harder.
- The Senate: Regular degens with equal votes (1 person = 1 vote) keep whales from yeeting the protocol.
- Voting Credit: Burn OINK to propose changes. Community votes, majority wins.

4. Reward Boost Events: FOMO Time

- Penalties from paper hands + inflation = juicy reward surges.
- After the party, inflation drops, and some tokens get burned to make OINK scarcer. Number go up? Maybe.

5. Inflation: Controlled Chaos

- Starts at 50,000 OINK every 10 minutes (1000x Bitcoin’s vibe).
- Reward Boost Events lower inflation over time, keeping the protocol spicy but sustainable.

MINING: HODL TO WIN

- Time-Locked Miners: Lock OINK for 1–5 years. Longer = more OINK rewards + governance clout.
 - Hop Miners: Upgrade to longer locks for bigger gains.
 - Rollover Bonuses: HODL past maturity for extra tendies.
 - Gift Miners: Send OINK miners to frens or cold storage.
 - NFT Mining: Governance picks NFT collections for mining rewards. Flex those jpegs.
 - Penalties for Paper Hands: Early exit? Lose 25–82%. Diamond hands only.
-

GOVERNANCE: DEGEN DEMOCRACY

- Voting Power: Proportional to lock time. HODLers run the show.
- Senate: Equal votes for regular chads. Vetoes whale shenanigans.
- Voting Credit: Burn OINK to propose changes. Community decides.
- Treasury Proposals: Fund grants, buybacks, or memes. You vote, it happens.
- Live Feedback: Governance actions hit Telegram for real-time degen debates.

THE VISION: PIGS FLY, COMMUNITY THRIVES

Piggy Bank isn't just a token—it's a movement. We're building a decentralized playground where:

- The treasury funds innovation, memes, and good vibes.
 - Governance gives power to HODLers and degens, not suits.
 - OINK buybacks (if you vote for 'em) could make pigs soar (no promises, just vibes).
 - Bitcoin showed the way; we're adding rocket fuel and a sense of humor.
-

RISKS: THE LAWYER PART

- Volatility: OINK could go to zero. Don't YOLO your rent money.
- No Guarantees: Buybacks and treasury use are community-driven, not a promise of profits.
- Experimental: This is a wild ride. Audited contracts, but no warranties.
- Not Financial Advice: We're degens, not CFAs. DYOR.

Disclaimer: OINK is a utility token for governance and mining, not an investment. No CEO, no office, no one to sue. This is a decentralized Wendy's, sir.

FAQ: QUICK HITS

What's Piggy Bank?

A Bitcoin-like protocol on PulseChain with a community treasury and governance. OINK = vibes + power.

How do I mine OINK?

Use PLS, PLSX, HEX, INC, or NFTs. Lock OINK for rewards. HODL or get rekt.

What's the treasury for?

Community votes on public goods, dApps, charity, or OINK buybacks to "make pigs fly" (no price promises).

How's it different from Bitcoin?

Same scarcity vibes, but faster, greener, and with a treasury + governance. Bitcoin's the GOAT; we're the PIG.

Is it safe?

Audited, but experimental. Could crash. Only risk what you can lose.

What's the Senate?

Based degens with equal votes to keep whales in check. Apply if you're a PulseChain chad.

Will OINK moon?

No promises. It's a tool for community building, not a Lambo printer. HODL responsibly.

THE PIGGY PROMISE: NO RUGS, JUST HUGS

Piggy Bank is live, complete, and fully decentralized. No team, no CEOs, no BS. The founding crew built this as a gift to PulseChain and peaced out. The community's in charge now.

- Distribution: Mine OINK with PulseChain tokens. Fair, wide, and degen-friendly.
- Endgame: A self-sustaining protocol where HODLers and the Senate build the future.

OINK OINK, MOTHERPIGGERS! LET'S MAKE PIGS FLY!
